You and your appointed contractor are advised to pay attention to the guide via [A Guide to Health and Safety in the Hong Kong Exhibition & Convention Industry Eng.pdf](#).

5.2.12 Waste Reduction and Recovery Measures

In 1998, HKSAR Government unveiled the Waste Reduction Framework Plan, which sets out various initiatives to heighten public awareness on waste reduction and recovery. Exhibitors and/or Contractors should observe the following waste reduction and minimization guidelines:

Design Stage

- 1) Plan for waste reduction before on-site operation to minimize waste generation.
- 2) Adopt modular exhibition designs and off-site pre-fabrication processes as far as practicable.
- 3) Use environmental-friendly materials (e.g. recycled materials) for stand design and construction, publicity and promotion.
- 4) Adopt flexible exhibition designs to include opportunities for future adaptation. Reuse of construction materials, use of recycled materials in construction and recyclable materials should be taken into account at the design stage.

Installation and Dismantling Stage

- 1) Check with the Organisers for locations of recycling facilities and items which could be recovered.
- 2) Instruct on-site staff of good recycling practice.
- 3) Install and dismantle in proper manner to avoid damages to items particularly those intended for reuse.
- 4) Plan stands dismantling properly to maximize the reuse and recycling of materials.
- 5) Fully utilize raw materials to avoid wastage.
- 6) Handle special waste (e.g. chemical waste) properly.
- 7) Consider reuse and recycling before disposal of the materials.
- 8) For technical advice, please contact the Waste Reduction Helpline: (852) 2755-2750 of the Environmental Protection Department of Hong Kong SAR Government.

Fluorescent Lamps Recycling Programme

Fluorescent lamps (straight tubes, round tubes, energy saving lamps and high intensity discharge lamps (e.g. mercury vapour lamp, metal halide lamp and sodium lamp) contain mercury. Release of mercury from broken lamps can contaminate the surrounding and create health hazard through inhalation or skin contact. Proper handling and disposal should be made in order not to harm humans and the environment and to comply with the relevant legal requirements.

In accordance with the Waste Disposal (Chemical Waste) (General) Regulation, Hong Kong Convention & Exhibition Centre has been approved as a waste producer for disposing mercury lamps. Nine recycling bins have been placed at G/F opposite to Design Gallery, Hall 1AC loading area, Hall 3CEG loading area and Hall 5CEG loading area.

5.2.13 Construction Industry Safety Training Certificate

Labour Department, Hong Kong Exhibition and Convention Industry Association (HKECIA) and the Venue Operator have concurrently agreed to endorse the Contractor Green Card System at the Venue.

With immediate effect, contractors entering the Venue for construction works are required to obtain the Construction Industry Safety Training Certificates (also known as "Green Card"). The main objective is to ensure that mandatory basic safety training has been provided to contractors before working at the Venue.

All stand fitting contractors must acquire the said certificates (cards) and have it displayed upon request when working at the Venue. The Venue Operator's security reserves the rights to refuse entry or remove personnel for those who fail to provide valid credentials.

Please feel free to contact the Event Planning & Co-ordination Team of the Venue Operator at hkcepc@hkcec.com or (852) 2582 8888 should you need further assistance.

5.2.14 All Exhibitors and Contractors must comply with the following requirements

Custom-built Stand Exhibitors must ensure that they and their Contractors are fully aware of the following requirements when preparing design proposals. Failure to observe such requirements may result in costly alterations on site being required by the Organisers and/or the Venue Operator and deduction of site work deposit. In the worst case, the Organisers may prohibit the construction of the intended Custom-built stand. Any charges so incurred will be entirely at the Exhibitor's expense:

1)	Site measurements are given in metric. Exhibitors/Contractors, upon arrival and before commencing construction work, are required to check if the site is set out as per floor plan issued by the Organisers, and to report any errors to the Organisers immediately. If the Contractor does not report any errors to the Organisers immediately, the Organisers will not be liable to any errors once construction work has been started by the party lodging the claim without first reporting the error to the Organisers.
2)	All structures built on ground must be self standing without the absolute use of hanging points. If any material is found attached to the Official Contractor's materials, site work deposit will be deducted and the Contractor is responsible to detach the attached point(s) accordingly. Extra sum will be claimed by the Official Contractor if their materials are damaged.
3)	No parts of any structures may extend beyond the boundaries of the site allocated except for general lighting devices (e.g. floodlight, Gilbert lamp, HQI light, spotlight etc... with extension arm) extruded not exceeding an overall length of 0.35m from booth boundary. These may include but not limit to plasma TVs, exhibits, decorative lighting, Exhibitor's company name or logo. Otherwise, site work deposit will be deducted.
4)	Any main constructions set-up deviated from the drawings submitted to the Organisers will be subject to site work deposit deduction.
5)	No suspensions could be made from the ceiling of the Exhibition Hall (except above mentioned hanging truss for lighting devices), nor may any fixings be made to the floor, walls or any other parts of the building.
6)	The Contractor is responsible to put its company name on the contractors' badges in a clearly identifiable way and/or without properly displaying at the Exhibition Venue.
